Dr:
Roberto Beltrán
Director
Latin American Programs
W.K. Kellogg Foundation
400 North Avenue
Battle Creek, Michigan 49016
U. S. A.

Dear Dr. Beltrán :

The Catholic University of Chile Faculty of Medicine, through its Schools of Medicine and Nursing, have developed a multidisciplinary work in health sector. Actually, we have concience that this multidisciplinary work must be interdisciplinary for contributing more efficiently, opportunely and integrally to community attention.

For obtaining this purpose, we think that an active, priority and creative participation of persons involved in this project is essential.

For these reasons, we are sponsoring an Integrated Health Program concerning Perinatal Health; Health Self care with emphasis in Continuing Education and Communitary Participation, and at least, a Primary Attention Program integrated to Child Health Control for promotion and prevention of Buccal-Maxillary-Facial Health of Healthy Child.

W.K. Kellogg contribution for developing this important program will be, undoubtedly, an important help for our Faculty of Medicine.

Thanking you in advance for your kindness in helping us, I remain ;

Sincerely yours

DR. JUAN DE DIOS VIAL C.
RECTOR
