---

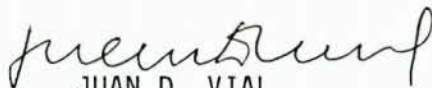

Dear Sir :

On behalf of the Catholic University of Chile, I am pleased to accept the grant given by your Centre according to your letter of May 6. A Grant to develop a Rural Agroindustry System will enable the Department of Agricultural Economics to carry out a research that the University was very interested in executing but didn't have adequate funding as required for that purpose. Thanks to the support provided by your institution, this project will become a reality in the near future.

According to the usual procedure with grants received from IDRC, please forward the funds as stipulated in your letter to the University account n°36996989 of the First National City Bank of New York.

Once again I would like to express the gratitude of our University for the present grant that will make possible a research that will have academic importance and a positive social effect on a low income rural community of our country.

Sincerely yours,

  
JUAN D. VIAL  
Rector
